

ASTM Press Release

FOR IMMEDIATE RELEASE Peachtree, City, GA August 16, 2011

MetalTech-USA Zinc Applications Meet ASTM Standards

All zinc applications produced by MetalTech-USA conform to ASTM standards

MetalTech-USA is pleased to announce that all of its zinc architectural applications conform to ASTM standards. Contractors, subcontractors and architects using MetalTech-USA zinc panel building systems will be able to satisfy stringent design requirements.

Both the bright rolled and blue gray zinc alloys used in our MT zinc building systems are classified as Type I under the ASTM guidelines. All of the zinc cladding fabricated by MetalTech-USA with the graphite gray alloy is classified under the Type 2 designation.

As a premier distributor and fabricator zinc building applications, MetalTech-USA is one of the few specialty fabricators in North America that is able to produce eco-friendly building solutions with ASTM B60-11 designation.

“Our zinc architectural applications already satisfy a number of requirements where sustainable design is concerned. We are pleased to learn that our zinc cladding now has ASTM designation on an international level,” said VP of MetalTech-USA, Eric Simonsen.
