MetalTech-USA Introduces Ready-to-Ship Flat Lock Panels

PEACHTREE CITY, GA., August 11, 2010 – MetalTech-USA, a premier distributor and fabricator of coil, sheet and architectural metal products, introduces a new product, MT Select Series Zinc flat lock panels.

The MT Select Series is a collection of six different zinc interlocking tiles that are pre-manufactured and stocked in the warehouse.

For one fixed price, MetalTech-USA offers pre-fabricated RHEINZINK® flat lock panels with clips and fasteners included. Prices are locked in once a quarter, so the panels are very cost competitive and eliminate the frustrations associated with rising material costs.

If a custom size isn't needed, the MT Select Series panels are a good choice to save money and installation time. MT Select Series flat lock panels work well for retrofit projects, curved surfaces, steeples, gables, walls and column covers. Pre-weathered zinc panels are natural, sustainable, long-lasting, and 100% recyclable and can last up to 120 years. In addition, the use of zinc can contribute to LEED points on a project. The panels are weather resistant and age to a beautiful patina.

“This a good panel for smaller projects where a pre-made size can be worked into the design,” said Penelope Baker, Marketing Manager at MetalTech-USA. “The MT Select Series flat lock panels are work equally well for both exterior and interior applications.”

More information, including a PDF of the MT Select Series specification sheet and a link to an online price request form, can be found at: <http://www.metaltech-usa.com/select.html>

About MetalTech-USA

MetalTech-USA is a premier distributor and fabricator of environmentally-friendly architectural metals. In partnership with RHEINZINK® America, Allegheny Ludlum, Hussey Copper and others, MetalTech-USA is working to promote the sustainable use of metals in architecture.
